Baseline Document Change Announcement

Flexible Delineators

BDC04S-05

July 16, 2004

SUBJECT: Revision to Subsection 916.14 of the 2001 Standard Inputs in both English and Metric Units regarding Flexible Delineators.

REFERENCE: BDC02S-23 entitled "Revision to Subsections 619.03, 619.04, 620.03, 620.04, 620.05, 916.04, 916.05, 916.08, 916.14 and 916.17 of the 2001 Standard Specifications for Road and Bridge Construction in English and Metric units" dated February 03, 2004.

Subsection 916.14, subpart 2 as it appears in the 2001 Standard Inputs (SIs) has been revised to specify that the retroreflective sheeting be protected from abrasion due to impacts, while maintaining its visibility. It is expected that this change would result in to a longer service life of sheeting on flexible delineators.

The following revision has been incorporated in both the English unit Standard Input SI2001E1 and Metric unit Standard Input SI2001M1 as of July 16, 2004:

SECTION 916 - SIGN MATERIALS

916.14 Flexible Delineators.

2. Composition.

THE FIRST PARAGRAPH IS CHANGED TO:

For ground mounted flexible delineators, the portion of the delineator above ground shall be one component, or shall be bonded together if it consists of two or more components. The shape of the delineator post where the retroreflective sheeting is applied shall have a cross section that protects the sheeting from abrasion upon impact.

Implementation Code R (ROUTINE)

Changes must be implemented in all applicable Department projects scheduled for Final Design Submission at least one month after the date of the BDC announcement. This will allow designers to make necessary plan, specifications, and estimate/proposal changes without requiring the need for an addenda or postponement of advertisement or receipt of bids.
